Russia continues to be one of the fastest growing economies in the world today. This strong domestic performance, combined with tax and other business reforms, is attracting continuing foreign investment, expanding trade relationships, and prompting Russian companies to truly engage with the global economy on all levels. Ukraine has also garnered considerable attention as a result of its "Orange Revolution," anticipated reforms, and 12% annual growth rate.

To bring you up to date on developments in Russian and Ukrainian securities and private equity markets, we invite you to Boston on April 26th for our **3rd Annual Financial Markets Conference**. You will hear directly from Russian and Ukrainian corporate leaders, international investment institutions, and U.S. executives with the inside story on how to participate in some of the world's most promising emerging markets.
